Environmental, social and governance (ESG) refers to three central factors in measuring the sustainability and ethical impact of an investment in a company or business.

Nuveen ESG ETFs invest in securities screened for positive ESG criteria.

INNOVATION FROM EXPERIENCE

Nuveen ETFs offer investors the benefits that have propelled the rapid growth of the ETF market combined with distinct active and passive solutions including a full suite of environmental, social and governance (ESG) focused strategies.

- **Opportunity** from a platform that seeks to improve upon the traditional models of index-based and actively managed investing
- **Flexibility** to choose core allocations with a traditional or responsible investment approach
- **Impact** of investing in strategies designed to align with your priorities and values

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or investment strategy and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with their financial advisors. Financial professionals should independently evaluate the risks associated with products or services and exercise independent judgment with respect to their clients.

Exchange Traded Funds (ETFs) may not be marketed or advertised as an open-end investment company or mutual fund. Shares of ETFs are bought and sold at market price as opposed to net asset value. As a result, an investor may pay more than net asset value when buying and receive less than net asset value when selling. In addition, brokerage commissions will reduce returns. Fund shares are not individually redeemable directly with the Fund, but blocks of shares may be acquired from the Fund and tendered for redemption to the Fund by certain institutional investors in Creation Units. An index based exchange-traded fund seeks to generally track the investment results of an index; however, the Funds may underperform, outperform or be more volatile than the referenced index. Please note, it is not possible to invest directly in an index.

***Active semi-transparent ETFs are different from traditional ETFs.** These Funds are actively managed, semi-transparent exchange-traded funds ("ETFs"). Unlike traditional ETFs that typically publish their portfolio holdings on a daily basis, these Funds do not publish the daily holdings of their actual portfolio (the "Actual Portfolio"). Instead, these Funds disclose the daily holdings of a portfolio transparency substitute (the "Proxy Portfolio"), which is designed by the Funds' sub-advisers to (i) reflect the economic exposure and risk characteristics of the Actual Portfolio on any given trading day, (ii) allow for the efficient trading of Fund shares by authorized participants ("Authorized Participants"), and (iii) shield the identity of the Funds' full daily portfolio holdings. The Proxy Portfolio includes some of the Actual Portfolio holdings, but there is no required minimum overlap of holdings between the Proxy Portfolio and the Actual Portfolio. In addition, each Fund publishes certain information metrics related to the Fund's Proxy Portfolio (the "Proxy Portfolio Disclosures"). This information is provided by the Fund to help keep the market price of Fund shares trading at or close to the underlying net asset value ("NAV") per share of the Fund.

Impact investing and/or Environmental, Social and Governance (ESG) managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG strategies may rely on certain values based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating.

Nuveen considers ESG integration to be the consideration of financially material ESG factors within the investment decision making process. Financial materiality and applicability of ESG factors varies by asset class and investment strategy. ESG factors may be among many factors considered in evaluating an investment decision, and unless otherwise stated in the relevant offering memorandum or prospectus, do not alter the investment guidelines, strategy or objectives. Select investment strategies do not integrate such ESG factors in the investment decision making process.

Important information on risk

Past performance is no guarantee of future results. All investments carry a certain degree of risk, including the possible loss of principal, and there is no assurance that an investment will provide positive performance over any period of time. Certain products and services may not be available to all entities or persons. There is no guarantee that investment objectives will be achieved. See the applicable product literature for details.

Responsible investing incorporates Environmental Social Governance (ESG) factors that may affect exposure to issuers, sectors, industries, limiting the type and number of investment opportunities available, which could result in excluding investments that perform well.

Before investing, please advise your clients to carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your Nuveen Advisor Consultant at 800.752.8700 or visit nuveen.com.
