### Important information on risk

Investing involves risk, principal loss is possible. There can be no assurance that any investment or asset class will provide positive performance over any period of time. Financial advisors should consider the suitability of the manager, strategy and program for their clients on an initial and ongoing basis.

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or an investment strategy, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Financial professionals should independently evaluate the risks associated with products or services and exercise independent judgment with respect to their clients.

Availability may change without notice. From time to time, we may close or reopen strategies and certain strategies may be available as other investment vehicles not listed. Vehicles are different investment products, each with its own features, terms and conditions, fee structures and risk factors and certain restrictions may apply. Recipients should inform themselves about and observe any applicable legal requirements. This information should not be considered a solicitation or an offer by Nuveen or its affiliates to provide any financial product or services in any jurisdiction where it is not otherwise authorized to do so.

Exchange Traded Funds (ETFs) may not be marketed or advertised as an open-end investment company or mutual fund. Shares of ETFs are bought and sold at market price as opposed to net asset value. As a result, an investor may pay more than net asset value when buying and receive less than net asset value when selling. In addition, brokerage commissions will reduce returns. Fund shares are not individually redeemable directly with the Fund, but blocks of shares may be acquired from the Fund and tendered for redemption to the Fund by certain institutional investors in Creation Units.

**If evaluating investment companies, please carefully consider the investment objectives, risks, charges and expenses before investing.
